

CO-BRANDING GUIDELINES

Get Set Learn is a future skills-focused learning startup backed by the iconic **Arvind Mafatlal Group**. We are committed to preparing India's 300+ million K-12 students for the future by equipping them with critical 21st-century skills and facilitate learning with the help of a robust training network.

This document serves as a comprehensive manual to ensure **consistent** and **correct** usage of the Get Set Learn brand across all internal and external communications.

It is intended for **designers, marketers, partners,** and **stakeholders** working with the brand.

LOGO VARIANTS

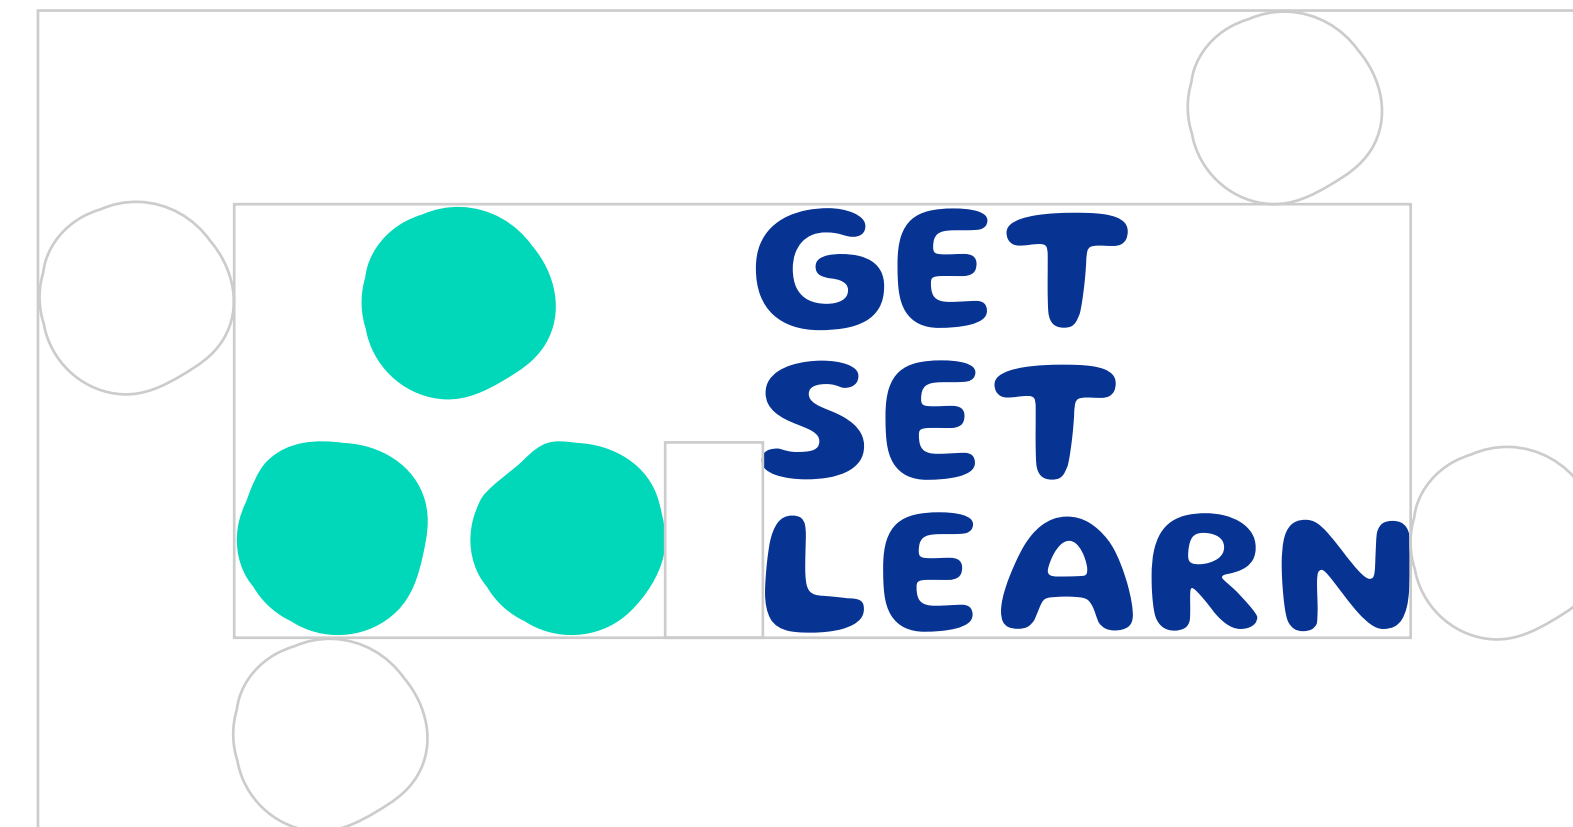

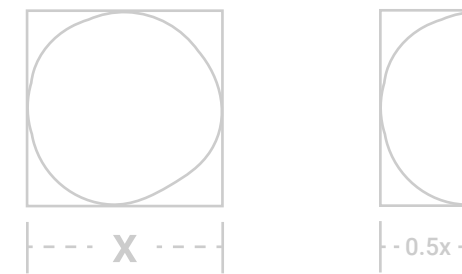

GET ● SET ● LEARN ●

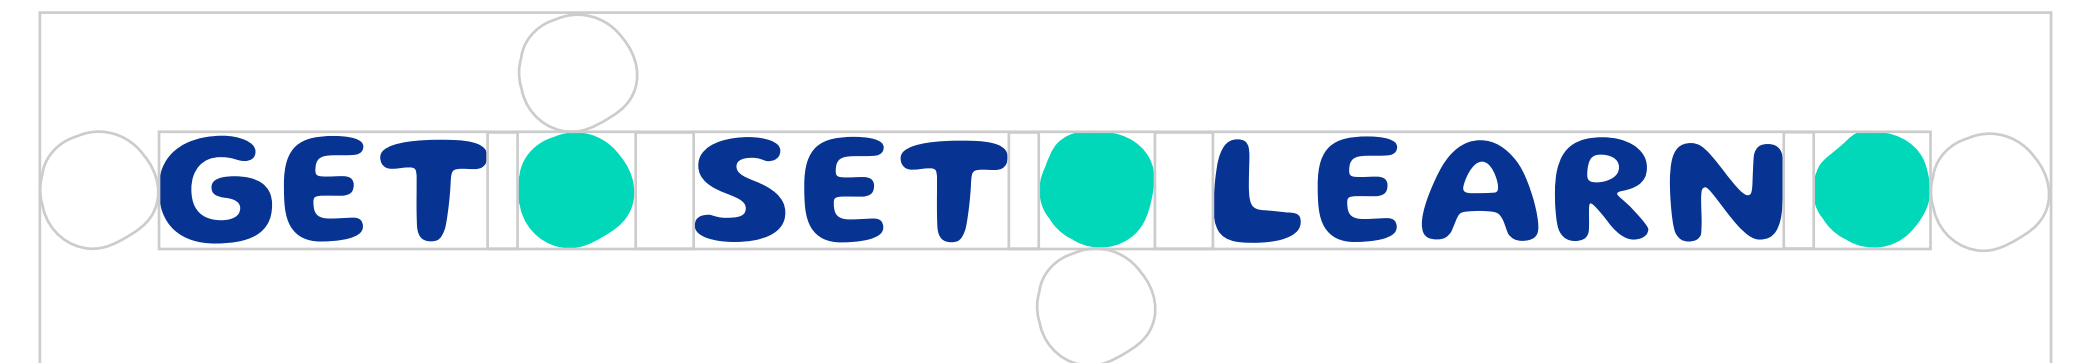

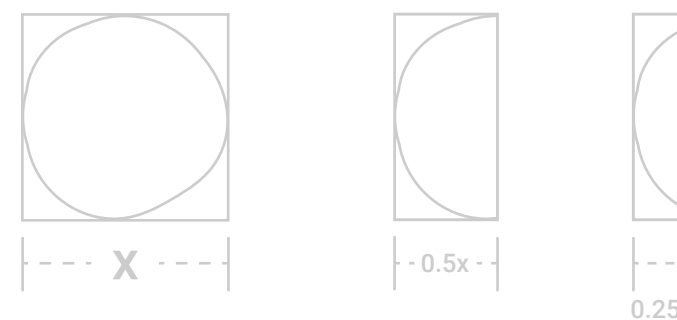

Primary Logo Placement
(to be used as much as possible
across all communication)

The minimum space around the logo should be equal to the size of the top circular shape in the logo mark (represented by x).
The space between the logo mark and the name is equal to half of the top circular shape from the logo mark (0.5x).

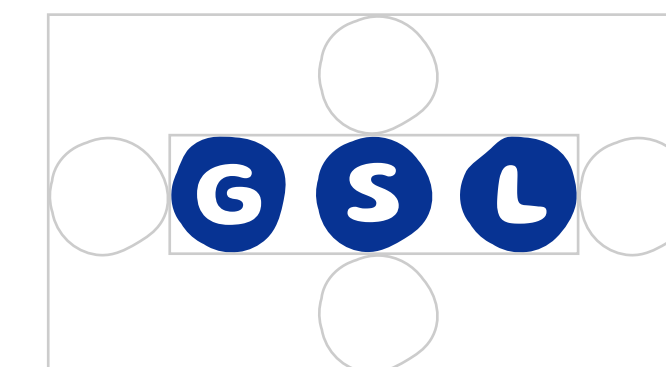

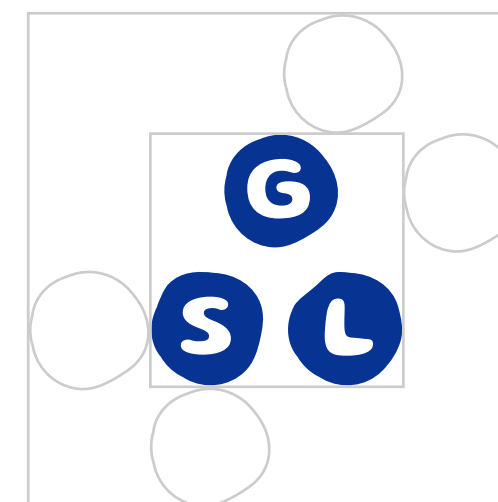

Secondary Logo Placement
(to be used when communication
doesn't allow)

The space between the logo marks and the words is equal to quarter of the top circular shape from the primary logo (0.25x).

Tertiary Logo Placements
(to be used in case of extreme space
constraints, or in the case of app icons, etc.)

MINIMUM SIZES

200 PX

SCREEN

1.5 INCH

ARVIND MAFATLAL GROUP

LOGO VARIANTS

Primary AMG logo used for all communications.

The primary logo lockup (with the Arvind Mafatlal Group logo) is to be used across all official communications, including formal documents, presentations, and institutional materials.

The secondary lockup (with the “An Arvind Mafatlal Group Company” tagline) is primarily used for social media creatives and digital content when there is no specific logo lockup.

[Access the high resolution logos here.](#)

There is a standard logo animation which should be used as the outro and can be used across other Get Set Learn video content as required.

CAMBRIDGE

LOGO GUIDELINES

Use this **primary** lockup for all communications featuring the Get Set Learn and Cambridge University Press & Assessment partnership.

Whenever there is a darker background, add a light beige/white coloured box behind the logo lockup.

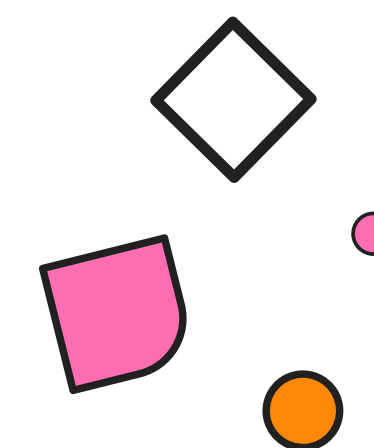

Use this **secondary** lockup for all small scale creatives where there isn't enough space for the taglines to be visible.

Whenever there is a darker background, add a light beige/white coloured box behind the logo lockup.

DESIGN EXAMPLE

As this certificate is the official document awarded to students during the Launchpad event, the primary logo lockup has been used to maintain brand consistency and authenticity.

This is a tent card design. Since the format is printed in a smaller size with limited space for branding, the secondary logo lockup has been used for better visibility and balance.

LOGO GUIDELINES

Get Set Learn has partnered with Harvard Business Impact to bring world-class leadership development to Indian schools.

Use the below logo lockup when representing the Get Set Learn and Harvard Business Impact partnership.

LOGO GUIDELINES

Stacked Version - Primary Composition

The primary option of the Arduino logo is the stacked version shown on the right.

It is composed of the Arduino registered logo followed by the written name.

The preferred color usage is Teal on a white background.

[Access the guidelines and the high resolution logos here.](#)

Stacked Version - Secondary Composition

The secondary option of the Arduino logo follows the previous stacked composition.

The suggested color usage is full white on teal background.

Do

– Use a white shape behind the logo on a noisy background

It is possible to use our colored logo inscribed in a white shape if needed, because of the background color. Please make sure to keep the “X” distance around the logo in the shape.

Do

–
Use the white logo on an even background

Total white on an even photographic background is possible, but colors should belong to the Arduino palette.

LOGO GUIDELINES FOR VIDEOS

1. All videos should feature the Partner × GSL logo lockup.
2. The video intro will include the official logo lockups along with the tagline.
3. The watermark should use the logo lockups without the tagline, in a smaller proportion.
4. The GSL logo animation will be used in the video outro.

[Access the detailed video guidelines here.](#)
